

Who and How to Request Support

- Wholesale Service Management API has been designed to work together with Members Portal, most of the support would be order related and managed via Assurance and Delivery team. This is a BAU operational activities just like when order placed via Members Portal.
- Support related to **Assurance** or **Delivery** of a specific order must go through the appropriate support channels. Vocus development team will not be able to assist those queries.
- All API specific assistance request can be sent via **Assurance** team support channels, or if agreed prior can be sent directly to Vocus development team. These requests must originate from the contact person in **Access Request.pdf**.
- **We are here to help!** Contact your account manager if you need to have a Q&A session with Vocus development team. They are happy to help and assist you in your API integration journey.
- When raising API related assistance request, it would be helpful to provide:
 - Summary of problem
 - WSM TransactionID
 - Step to Reproduce issue
